

## Building in Blockchain

### Alcobendas, Spain

Pre-seed company established in 2019

### Teaser of the company

We build platforms for Smart Contract creation without programming knowledge.

Our platform as a service allows any user to edit, create and manage smart contracts on the Ethereum network.

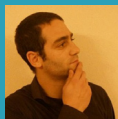

Our platform is entirely graphical and is managed through a very simple and intuitive website designed for any user to make use of it. The contracts we develop are designed for legal and financial entities that are in the discovery phase of DLT technology and we work together with them to take full advantage of this technology.

Madrid, Spain

### Team making ChangeTheBlock great

**Alan Draguilow**  
CEO

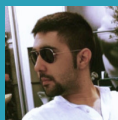

**Diego Ruiz**  
Analytics

**Víctor Manuel**  
CTO

**Katia Gozlan**  
COO

**Yarón Chocrón**  
CMO

### Blockchers Use Case Scenario

**ChangeTheBlock will implement the following use case scenario**

#### End User SME

Nowadays our client, Pinsent Masons, wants to write and create smart contracts but doesn't have the IT resources to do it. Thanks to our platform they will offer new services to their own clients.

We will develop 2 smart contracts to be managed with a web interface and we will digitalize some existing contracts to be signed on the Ethereum network.

Using our platform, 50 users from the company around the world will sign, create, edit and manage smart contracts without any programming knowledge.

This project has received funding from the European Union's Horizon 2020 research and innovation framework programme through Grant Agreement no. 828840
