

# Pact.

Enabling trustful  
collaborations in healthcare.

**Amsterdam, Netherlands**

Pre-seed company established in **2018**

## Teaser of the company

Developing blockchain solutions to break data silos and increase patient-centered health care.

At Pact Care, we offer a combination of blockchain and data curation tools that allow healthcare organizations, such as insurance and pharmaceutical companies, to gain trust and save time on capturing and processing remotely generated patient health data.

## Blockchers Use Case Scenario

**Pact Care will implement the following use case scenario**

### End User SME

Today, physiotherapists cannot get reimbursed for higher quality care because insurance companies can't verify the integrity of the quality-related data that is shared with them. "PhysioTrust" is a blockchain-based platform that enables the secure, auditable and patient centered collection and exchange of data related to quality of care (e.g. patient reported outcomes). This is the first step towards mutual trust and cooperation between physiotherapists, insurance and patients. In a second stage, this platform also enables automated reimbursement contracting (smart contracts) based on the quality metrics agreed upon and achieved.

## Team making Pact Care great

**Andre S. Fialho**  
CEO

**David Hawig**  
CTO

**Sebastian Fuhrhop**  
Engineer
