

eHealth – Innovation for health

Alava, Spain

Seed company established in **2018**

Teaser of the company

Digitize transformation of medical process. We are the first worldwide to incorporate audiovisual developments specifically created to explain a medical / surgical act with animation. It is conceived and born as a company to provide solutions in the field of digitalization of medical processes. We are exclusively dedicated to developing tools that always combine two converging objectives:

- To facilitate the work of the health professional
- To increase the efficiency and effectiveness of communication, management and results towards the user of the system, i.e. the patient.
- Usefulness and functionality, critical and essential elements in any tool or service that seeks to provide value in the health field. Ours incorporate them from the moment of their conception.

Team making eProcess med great

Blockchers Use Case Scenario

E-processMED will implement the following use case scenario

End User SME

The patient information could be in person or telematic. Our clients need to document the acceptance of their patients of the agreed services, guaranteeing in time the consideration of these documents and their non-repudiation.

The project seeks to develop remote validation schemes that significantly minimize repudiation regarding the knowledge and understanding of informed consents generating less anxiety and stress in patients and safety for specialist.

Notes:
