

# blocksquare

Real Estate on the Block

**Ljubljana, Slovenia**

Seed company established in **2017**

## Teaser of the company

Increase value and liquidity of real estate properties in your portfolio.

Blocksquare enables companies with real estate portfolios to increase value and liquidity of assets through tokenization, providing a compliant and cost-effective solution to convert a single real estate property into 100,000 blockchain-based digital shares, so multiple buyers can globally access investments in buildings of any size and type.

## Blockchers Use Case Scenario

**Blocksquare.io will implement the following use case scenario**

### End User SME

As the market leaders for property valuation services (MS=40%), NAI Significa makes business with all major banks in Slovenia.

Integrating our tokenization system will allow NAI Significa to connect banks, CRE owners/developers, and bank customers. Post-2009, RE projects need to bring more capital to get bank financing approved, resulting in fewer deals.

On the other side, bank customers in Slovenia have 20 bln € sitting on accounts. Seamlessly connecting the 2 solves problems to all 3 sides.

**Notes:**

**Team making  
Blocksquare.io great**
