

Unlocking global collective intelligence by formalizing knowledge and individual expertise

**Tallin, Estonia**

Seed company established in **2018**

UiO **Hybrid Technology Hub**

## Team making DEIP great

## Teaser of the company

A digital ecosystem for innovators. DEIP Open Innovation Network is a digital ecosystem specifically designed to foster international and inter-disciplinary collaboration among innovators by encouraging the sharing of expertise and resources.

DEIP provide a brand new crypto economic for the innovation, which provides reputational and financial incentivization.

## Blockchers Use Case Scenario

DEIP will implement the following use case scenario

### End User SME

Smart-contracts for grants distribution automation. Smart-contract allows end-user SME to automate decision-making for grants distribution based on the results of peer-review, therefore significantly cuts efforts and time to fund the most promising and impactful projects and technology.

DLT serves as the infrastructure for decentralized assessment and ensures transparency of the peer-review process and decision-making. The private beta will be deployed as a private network for SME and partners

### Notes:
