

Bettergy

Changing the current energy model by creating innovative global technological solutions

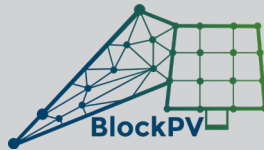

Malaga, Spain

Seed company established in **2011**

Teaser of the company

We are a data driven energy efficiency software platform. Bettergy is an cleachtech startup providing technology and services to businesses and energy retailers turning data consumption information into actionable energy savings and lower carbon emissions.

Our platform EnergySequence (ES) provides a full set of automated energy conservation measures, operational, retrofit, and investment opportunities leveraging consumption data, aggregating private and public data sources such as weather data, and geolocation data.

Blockchangers Use Case Scenario

Bettergy will implement the following use case scenario

End User SME

We offer investors & SMEs a digital approach for photovoltaic Power Purchase Agreements, a BC SmartContract will issue invoices according to production and prices agreed providing a trusted independent verification and lowering overhead costs.

Previous R&D led to proof of concept and development of PV web app lacking Ledger Tech. Bettergy & Fundeen have pioneered the 1st crowdfunded Photovoltaic PPA contract in Spain, Calanova Golf with 40kwp where the solution can be deployed. bit.do/eTn

Team making Bettergy great
